Skills

- AWS, Terraform, Ansible
- Kubernetes (Helm, Argo CD)
- Gitlab-CI, Jenkins
- Prometheus, Elasticsearch, Kibana
- Python, Bash Scripting
- DevSecOps (Gitleaks, SonarQube, DefectDojo, Trivy, OWASP Zap)

Experience

Senior DevOps Engineer | Surbana Jurong Group | Dec 2024 – Dec 2025

- Provision AWS infrastructure including EKS Fargate, API Gateway, CloudFront, WAF, ECS using Terraform
- Create Terraform pipeline with plugins cache and checkov scan
- Create CI/CD pipelines for .NET and Node.js applications on Gitlab CI with integrated SAST checks and speed up build time using caching
- Containerize apps using docker, and write Helm charts to deploy to EKS
- Configure AWS logging using Elastic fleet and Kibana

DevSecOps Engineer | Robi Axiata Limited | Feb 2020 – Sep 2024

- Provision AWS EKS clusters with auto-scaling node group by using Terraform EKS & VPC modules
- Write k8s helm charts with separate values files for each microservice app and deploy the charts from git repo by using Argo CD (GitOps)
- Setup infrastructure & application monitoring by scraping pods services with Prometheus
- Parse app pod logs using Fluentd configmap and send parsed logs to Elasticsearch and Kibana
- Integrate security testing such as pre-commit hooks, SCA, SAST, DAST, container scan, and vulnerability management in DevSecOps pipelines by scanning using containerized tools (Gitleaks, SonarQube SAST, Dependency Check, DefectDojo, Trivy, OWASP Zap)
- Configure servers (install packages, create users, run services & apps) with Ansible playbooks

Certification

- Certified Scrum Product Owner® (CSPO®) | Scrum Alliance | 2020

Education

- Bachelor of Science in Electrical Engineering | Virginia Tech University | USA | 2019
